SOLUTION

Bending Spoons offers milan-based technology company that buys established digital products and improves their monetization and efficiency. ipo'd on nasdaq july 1 2026 at \$29/share (\$18.4b); revenue \$1.31b in 2025 (+95% yoy) and \$601m in q1 2026 (+132% yoy). inputs below use disclosed figures where available; cac/ltv are analyst assumptions (4x) as the company does not disclose them. The solution should be diligenced for speed to value, workflow depth, and measurable customer ROI.

Confidence: Medium · Sources: Website, Product Page

BUSINESS MODEL

The business model is Acquires proven consumer software products (Evernote, Vimeo, WeTransfer, Eventbrite, AOL) and operates them for the long term. Revenue is expected to come from subscriptions across the app portfolio, with expansion potential if retention and usage depth are strong.

Confidence: High · Sources: Website, Pricing Page, Company Profile

MARKET OPPORTUNITY

The SaaS market can support venture-scale outcomes if the company captures a high-frequency workflow, expands across adjacent use cases, and demonstrates pricing power beyond the initial wedge.

Confidence: Medium · Sources: Website, Market Signals, Blog

COMPETITIVE LANDSCAPE

Competitive intensity is currently marked as High. The diligence focus should be direct substitutes, incumbent platforms, switching costs, and whether the company has a differentiated distribution channel.

Confidence: Medium · Sources: Website, Market Signals

RISKS & RED FLAGS

- Competitive intensity is high, which may compress pricing power and increase CAC over time.
- Growth rate is modest for the stage, suggesting either market saturation or a go-to-market issue.
